Python, Matlab, C++, Git

PROFILE

- » Master thesis student in the Neuro-X master at EPFL. Mostly interested in Neuroscience, Philosophy and the behavioral and conceptual impact of neurophysiology, I am also curious about Politics, Literature and History.

EDUCATION

- 2020/03–2024 **Bachelor in life Sciences**
École Polytechnique fédérale de Lausanne Lausanne, Switzerland
» Theoretical courses covering multiple bio-engineering subjects as well as lab practicals in molecular biology and programming projects (python/C++)
- 2024/09–present **Neuro-X master**
École Polytechnique fédérale de Lausanne Lausanne, Switzerland
» Theoretical courses covering multiple neuro-engineering subjects as well as practicals in physiology and data sciences projects (python)

WORK

- 2022-present **President of a Philosophy association EPFL**
École Polytechnique fédérale de Lausanne Lausanne, Switzerland
» Organizing conferences, debates and discussions between students (choosing a subject and advertisement) and managing a team of 6. The subjects are mostly around ethics, consciousness and topics linking science and Philosophy
- 2024-present **President of the concours Chopin**
École Polytechnique fédérale de Lausanne Lausanne, Switzerland
» Creation of the first piano competition for students on Chopin at EPFL/Unil. Organization of the selection from 40 participants to 10 finalists. Sponsoring and advertisement. Second edition in collaboration with ETHZ and UZH.

PROJECTS

- 2025-present **Inter-individual differences in EEG signals Prof. M. Herzog's Lab**
École Polytechnique fédérale de Lausanne and CMU Lausanne, Switzerland
» (60% then 100% ongoing). Conceptualising and building an fMRI-EEG experiment (matlab). Acquisition, building of preprocessing pipeline, ERP analysis, head modeling and forward modeling.
- 2025 **fMRI-EEG study on Neurofeedback**
CMU Geneva, Switzerland
» (100%) Acquisition, preprocessing and frequency / ERP analysis of EEG signals. Building the preprocessing and analysis pipeline in python.
- 2024-present **Conceptual research project on consciousness in Prof. M. Herzog's Lab**
École Polytechnique fédérale de Lausanne Lausanne, Switzerland
» Working on a paper analyzing the axiomatic approach of IIT and the epistemological consequences (building philosophical and empirical arguments from neuroscience).
- 2024 **EEG analysis internship, Prof. D. Van de Ville and Prof. D. Bavelier**
École Polytechnique fédérale de Lausanne Geneva, Switzerland
» Semester project (30%): collaboration between the Bavelier Lab and Prof. D. Van de Ville for the analysis of EEG signals
- 2024 **EEG internship, D. Bavelier Lab**
Swiss center for affective Sciences Geneva, Switzerland
» Summer internship (100%) including EEG acquisitions (20 participants) and preprocessing (MNE annotations and ICA).
- 2024 **Vision and philosophy research project in Prof. M. Herzog's Lab**

- » Written paper on the debate of the richness of peripheral vision. Review of literature, development of a conceptual framework to analyze the theories, analysis of illusions using this framework, proposition of an alternative model of richness.

INTERESTS

- » Thirteen years of piano including ten years of private lessons and a concert
